

MGM Targets and Thermbright Ink Distributorship Agreement

MGM Targets, Caldwell ID, has been appointed the exclusive US Distributor for **Thermbright Passive Thermal Targets** manufactured by MJ Services (GB) Ltd in the United Kingdom. As the name implies, the Thermbright Passive Thermal Targets require no power, batteries or cables of any kind because they have “natural thermal contrast properties”. These targets are primarily used by military units to train in night operations and include infantry ‘E’ Type silhouettes as well as various vehicle-sized targets for crew served weapons and aerial platforms, all thermal imager capable. See these new targets and the entire MGM Targets family of products at the SHOT Show 2012, booth 20226 or call MGM targets (208-454-0555) to schedule a demonstration.
