

## MGM SPONSORS THE STEEL CHALLENGE CHAMPIONSHIPS

As the Summer continues to heat up so does the competition among some of the top shooters from across the United States. This month all eyes are on the World Speed Shooting Steel Challenge Championships held August 19-21 in Piru, CA. Piru is located about 45 minutes from the match hotel, Hilton Gardens Inn in Valencia, home to Six Flags Magic Mountain.

This will be a true World Championship Event with the greatest shooters in the world displaying their speed and accuracy. The match itself draws shooters from across the full spectrum of the shooting sports. USPSA, IDPA, SASS, GSSF and others will be gathering to test their skills at the range in Piru. The Steel Challenge Shooting Association (SCSA) is one of the fastest growing practical-shooting sports in the United States. Steel shooting is easy to understand and may be less intimidating than other practical shooting disciplines. Steel shooting provides an excellent vehicle for young or new shooters to begin. The match is highly spectator-friendly and with the availability of the family fun filled Magic Mountain at its backdoor this match can truly be a family outing or vacation.

MGM Targets out of Caldwell, ID has signed on as one of the matches Bronze Benefactors, sponsoring the Jr. Division. Mike Gibson, President of MGM Targets stated, "We love when we have the opportunity to sponsor an event such as this. Helping our sport of shooting grow is one of our main goals as a company. Reaching out to the youth of our country, teaching them the safe use of firearms, instructing them on the skills necessary to become proficient as a shooter, and the sheer joy in their faces when they compete is rewarding to me personally and to our sport in general." Mike continued, "The way any sport grows is by getting the youth involved at an early age. Introducing them and educating them is one of our primary goals and not only do we sponsor events like this, but we also contribute \$.03 of all of our IPSC Targets we sell to help support youth shooting across the United States."

This Steel Challenge event will be shown on the Outdoor Channel TV show, Shooting USA. Check with Shooting USA for a schedule of when the match will be broadcast.
